## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 43-75, drawn to a separating device for isolating at least one component from sample of biological origin, classified in class 422, subclass 101.
  - II. Claims 76-84, drawn to a method of isolating at least one component from a sample of biological origin, classified in class 436, subclass 177.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, as the process in claim 76 does not recite the particulars of the apparatus in claim 43, such as a liquid-permeable separating element with pores arranged in a first vessel, the first vessel with an at least virtually gas-impermeable connecting element at one of its end regions for connecting the first vessel to a second vessel, or the first vessel with a connecting device, such as a blood-sampling tube, to connect the first vessel to the second vessel. The apparatus as claimed can be used to practice another and materially different process, such as excluding the step of stabilizing the sample or component in the first vessel or evacuating the vessels.

Art Unit: 1743

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Kurt Kelman on 9/8/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Quan whose telephone number is (703) 305-1947. The examiner can normally be reached on M-F (8:00-4:30).
